

# Swaroop Pagonda

Actively looking for a role as Senior Data Engineer/Data Scientist having 7.5 years of experience in the Software Industry. Worked in all levels from design, development, bug fixes, performance tuning, and production deployment activities. Proficient in predictive modelling, data processing, data mining, and data pipeline management using Python and R.

## Education

**2022 till present**

**University of Essex**

Post Graduation in Applied Data Science

**2010 – 2014**

**RV College of Engineering**

Bachelors of Engineering, 8.13 CGPA

## Contact

### Email

swaroop516@gmail.com

### Contact Number

07776589326

### Address

36 Marine House, Colchester  
CO2 8FX

### LinkedIn

<https://www.linkedin.com/in/swaroop-pagonda>

## Skills

### Data Science

Machine learning    Deep learning  
Statistical analysis    Pattern recognition

### Machine learning

Regression Classification Clustering

### Programming

Python    SQL    PLSQL    R

### Databases

Teradata Redshift    Postgress  
Scylla    Oracle    Cassandra

### ETL

Spark Pyspark    Talend    Airflow  
Argo

### Cloud

AWS: S3    EC2    RDS    CloudWatch  
Azure: Blob Containers    DataBricks

### Framework

Docker Kubernetes    Helm    Terraform

### Miscellaneous

Unix    Shell Scripting    FSLDM    Tableau  
Agile    Kanban    JIRA    Graphana

## Achievements

### Certification

Teradata I4 Certified Professional.

### Awards

Employee of Quarter Q3 2018 at  
Teradata India Pvt Ltd

## Experiences

**Oct'19 to Jan'22**

### Sr Data Engineer at Zebra Technologies

- Designed data ingestion & data validation in AWS S3 data lake.
- Developed pipelines in Apache Airflow for around 11 data process flows for the supply chain customer.
- Refactored spark code for optimization improving the performance by 35%.
- Upgraded data bricks to utilize the new features and handled 60% of the compatibility errors occurred.
- Migrated 100% of code in R to spark.
- Designed code to suit disaster recovery.
  - Designed & developed unit testing framework for CI/CD Pipeline
- Designed denormalized data model for wide column storage database Scylla DB to reduce around 85% of multiple API calls.

### Sr. Data Engineer at Zebra Technologies

- Designed the data lake in Azure for sell\_in B2B data from scratch which will be the source for Data science team.
- Handled 60 million to 1 billion of data..
- Modularized code to handle billions of batch data.
- Designed and developed validation report to check the file count w.r.t to the last run reducing the manual effort by 90%.
- Involved in migration of SAS to Antuit Demand Forecasting Product Engine.

**July'17 to Oct'19**

### Sr. Data Engineer at Teradata India Pvt. Ltd.

- Developed Text based search engine for onboarding in Banking.
- Have written python code to calculate string matching percentage for searching in backend DB.
- Used string matching algorithms like Levenstein distance, Jarowinkler and cosine similarity.
- Developed Python flask APIs to interact with UI.
- Used Redis cache for fast processing improving the performance by 58%.
- Based on the previous search patterns, used ranking based sort order.

### Data Engineer at Teradata India Pvt. Ltd.

- Involved in the design and development phase to extract 300 tables in the data lake for the retail customer.
- Automated the data extraction using TPT script. And TPT script generation is automated using shell script and saved 30 hours of effort
- Dumping the data into GCP cloud which was later used for data science projects in P&G.

**July'14 to July'17**

### Data Engineer at Capgemini India Pvt. Ltd.

- This project involved building a new semantic layer for capital, market, and risk reporting to the treasury of the bank.
- Involved in the architecture, design, and data modelling of semantic layer in Data warehouse.
- Daily interactions with business and stakeholders on requirements and issues.
- Wrote Transformation views and stored procedures in Teradata SQL.
- Generated reconciliation reports for Regulatory reporting.
